## **RED ONION**

Red onion is grown in Maharashtra mainly in Nashik district which is hub of onion in india and has high demand internationally. Onion is locally called pyaz.

# LEMON

Lemons (*Citrus limon*) are among the world's most popular citrus fruits. They grow on lemon trees and are a hybrid of the original citron and lime. There are many ways to enjoy lemons, but they taste very sour and are usually not eaten alone or as a whole fruit.

Lemon water is generally safe to drink, but there are a few potential side effects to be aware of. Lemon contains citric acid, which may erode tooth enamel. To limit the risk, drink lemon water through a straw, and rinse your mouth with plain water afterwards.

## POMEGRANATE

The pomegranate, or *Punica granatum*, is a shrub that produces a red fruit ( 1 ). Categorized as a berry, the pomegranate fruit is about 5–12 cm (2–5 inches) in diameter. ... The seeds and arils are the edible parts of the fruit— eaten either raw or processed into pomegranate juice — but the peel is discarded.

## Banana (G9)

Bananas are vigorously growing, monocotyledonous herbaceous plants. This banana is not a tree but a high herb that can attain up to 4 meters of height G9 is one of the most commonly cultivated Cavendish bananas. These are the high yielding plantain among all the banana varieties which is introduced to
